

DIF Entrepreneur Bootcamp

Unlock the Future of Dermatology Product Development

About

This bootcamp, returning to the Dermatology Innovation Forum, offers a unique opportunity to gain hands-on knowledge for developing dermatological therapies. All registered attendees, whether entrepreneurs, researchers, clinicians, or regulatory experts, will gain tools and insights to navigate product development complexities. You'll learn preclinical, translational, and clinical trial strategies to transform your pipeline.

Why Attend?

- **Stay Ahead of the Curve:** Hear the latest trends and insights
- **Hands-On Training:** Real-world scenarios will give you the tools to take your project to the next level
- **Expert Faculty:** Learn from dermatology leaders with decades of experience in dermatology product development

Who Should Attend?

- **Entrepreneurs**
- **Innovators**
- **Physicians**
- **Pharma + Biotech Professionals**

Speakers

Michael D. Howell, PhD
Mountaineer Biosciences, Inc.

Jasmina Jankicevic, MD, MSc, CCRP
Innovaderm Research

Vijendra Nalamothu, PhD
Dermatological Product Development & Commercialization

What You'll Gain

- Actionable strategies to advance your projects
- **Clear understanding of dermatology product development landscape**
- Expert case studies on key development steps
- **Effective compound screening methods**
- Optimal translational research approaches
- **Strategies for utilizing early PoC data**
- CMC data pitfall awareness and prevention
- **Systematic development appreciation**
- Data leverage for clinical and regulatory success
- **Networking with industry leaders**
