Who is GlobalSkin?

300+ Members

74 Countries

59 Disease Areas

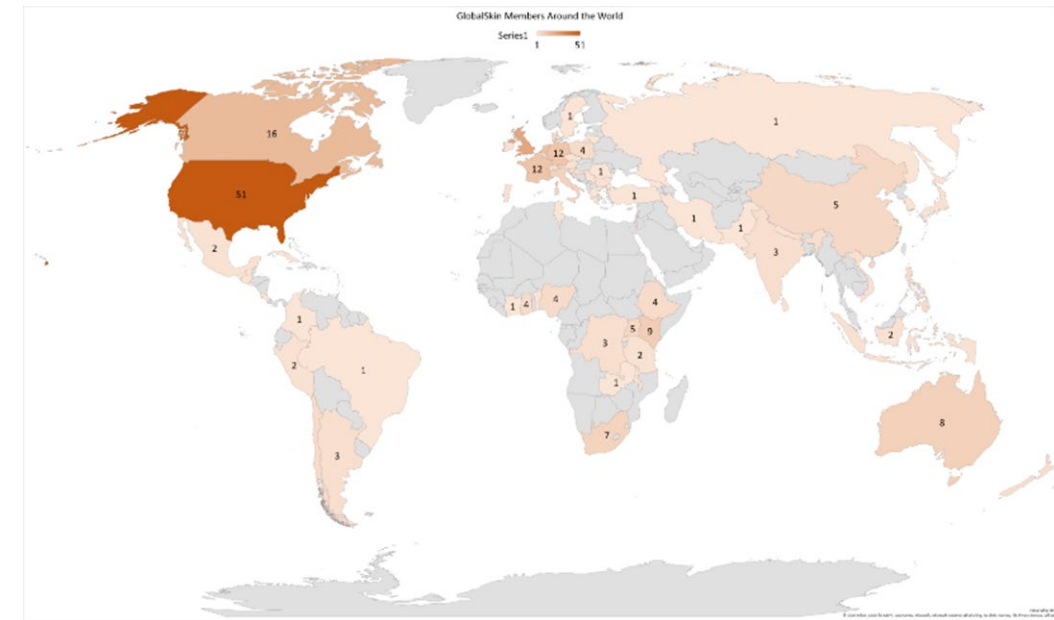

GLOBALSKIN.ORG

International Alliance of
Dermatology Patient
Organizations

The International Alliance of Dermatology Patient Organizations (also known as GlobalSkin) is:

- A unique **global alliance** of dermatology patient organizations
- **Professionally-run** organization with staff located in Canada and Belgium
- Directed by a **global Board of Directors** comprised of patient organization leaders, governed by a rigorous code of ethics

Patient Advocacy Challenge

- Regulatory Agencies/Decision-makers/Payers/HTA want the patient voice
- They *do* and they *don't* want patient stories **BUT...their decision-making rubrics are based on DATA**

What if...

- Quality of Life was measured using a measurement tool *developed* by **patients**
- A **credible** patient voice could be built upon **verifiable** data
- Policy-makers wouldn't **ever** make a decision without including a **patient-led measure**

GRIDD
Global Research on the Impact
of Dermatological Diseases

Do we truly know
what it's like to live
with skin disease?

GRIDD will generate data
that paints a clear picture.

Get involved:

Skin patient burden includes stigmatization and minimization.

That
disgusts
me!

Don't touch me.
Don't come
near me.

What's wrong
with you??

It's only
your skin.

I can't
look away.

Is that
contagious?

25.8% of patient
respondents have
thought about or
attempted to take
their lives.¹

15-20% report
feelings of
stigmatization²

Patient Inclusion in GRIDD: 5600+ patients

Item Gathering: 2019-2020

- Workshop: **37** patients in **16** countries and **14** diseases
- Patient interviews: **28** patients in **11** countries and **5** diseases
- Outcome: **263 items**

Phase
2

Delphi Surveys: 2020-2021

- **1154** patients in **61** countries and **90** diseases
- Outcome: **27 items**

Phase
3

Cognitive Interviews: 2021

- **12** patients in **4** countries and **6** diseases
- Outcome: **26 items**

Phase
4

Psychometrics Surveys: 2021-2022

- Survey #1: **486** patients (Completed Dec. 2021)
- Survey #2: Test - **504** patients completed July 2022; re-test – **272** patients (Completed Sept. 2022)
- Outcome: **16 items**

Phase
4

GRIDD Study: 2023 used the 16 question PRIDD measure for the first time

- Survey #1: **4000+** patients (Closed Dec 31, 2023)
- Survey #2: Re-test **1230+** patients (Closed Dec 31, 2023)

Phase
5

Patient-Reported Impact of Dermatological Diseases

We know dermatological conditions impact people over a long period of time, but this questionnaire aims to measure how much your dermatological condition has affected your life **OVER THE LAST MONTH**. Please consider each question in relation to your dermatological condition. Mark one box only for each question. We have provided examples to give you an idea of the things you might consider, but these should not limit your answers. Dermatological conditions can affect the skin, hair, nails and/or mucous membrane. The word 'skin' here includes any of these aspects relevant to your condition.

Because of my dermatological condition...

1	...I have experienced physical discomfort, soreness or irritation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
2	...my sleep has been disturbed	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
3	...I have felt tired, fatigued or lacked energy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
4	...my general physical health has been negatively affected	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
5	...my treatment has caused practical problems (for example, by taking up time or being messy)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
6	...my leisure time (for example, hobbies, sports or exercise) has been negatively affected	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
7	...my everyday choices have been affected (for example, choice of clothes, hairstyle or products)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
8	...I rely on others to help me with everyday tasks	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Occasionally	Often	Always	
9	...I have had extra expenses	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
10	...I have felt anxious, worried or nervous	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
11	...my condition has dominated my thoughts	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
12	...I have felt depressed or low in mood	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always

13	...my relationships with those close to me have been negatively affected	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
14	...my social life or social interactions have been negatively affected	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
15	...I have been prevented from or found it difficult to be intimate with another person	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always
16	...I have struggled to perform roles important to me (for example, to be caregiver / parent / partner / employee / student)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Never	Rarely	Sometimes	Often	Always

Please make sure you have answered every question.

Thank you.

PRIDD assesses 4 domains:

SOCIAL

LIFE RESPONSIBILITIES

PHYSICAL

PSYCHOLOGICAL

Psychometric testing – PRIDD results

		Requirement	Rating	Results
Structural validity	Unidimensionality	- No violation of unidimensionality - No violation of local independence - Adequate model fit: $\chi^2 > 0.01$	+	PRIDD and all subscales unidimensional with no local dependency. $\chi^2 = 0.11$
	Structural validity	CFI or TLI or comparable measure > 0.95 OR RMSEA < 0.06 OR SRMR < 0.08	+	CFI = 0.96; TLI = 0.97; RMSEA = 0.09; SRMR = 0.03
Internal consistency		Person Separation Index ≥ 0.7	+	Person Separation Index = 0.89
Hypothesis testing for construct validity		75% of hypotheses met	+	76% of hypotheses met
Test-retest reliability		ICC or weighted Kappa ≥ 0.70	+	ICC = 0.93
Measurement error		SDC or LoA $< MIC$	+	LoA (1.3) $< MIC$ (4.14) Unable to determine anchor-based MIC
Responsiveness		The result is in accordance with the hypothesis OR AUC ≥ 0.70	+	Manuscript submitted, awaiting peer review
Floor & ceiling effects		Considered present when $> 15\%$ of the patients achieved the minimum or maximum possible score	+	$< 0.9\%$ with minimum or maximum score
MIC		N/A		Currently in process
“+” = sufficient, “-” = insufficient, “?” = indeterminate CFI: Comparative Fit Index; TLI : Tucker-Lewis Index; RMSEA: Root Mean Square Error of Approximation; SRMR: Standardised Root Mean Square; ICC: Intraclass Correlation Coefficient; SDC: Smallest Detectable Change; LoA: Limits of Agreement; MIC: Minimally Important Change				

W = weak evidence; + = sufficient evidence; - = insufficient evidence; ? = indeterminate evidence

A= Recommended for use

B-Potential to be recommended for use, but they require further research

C= Should not be recommended for use

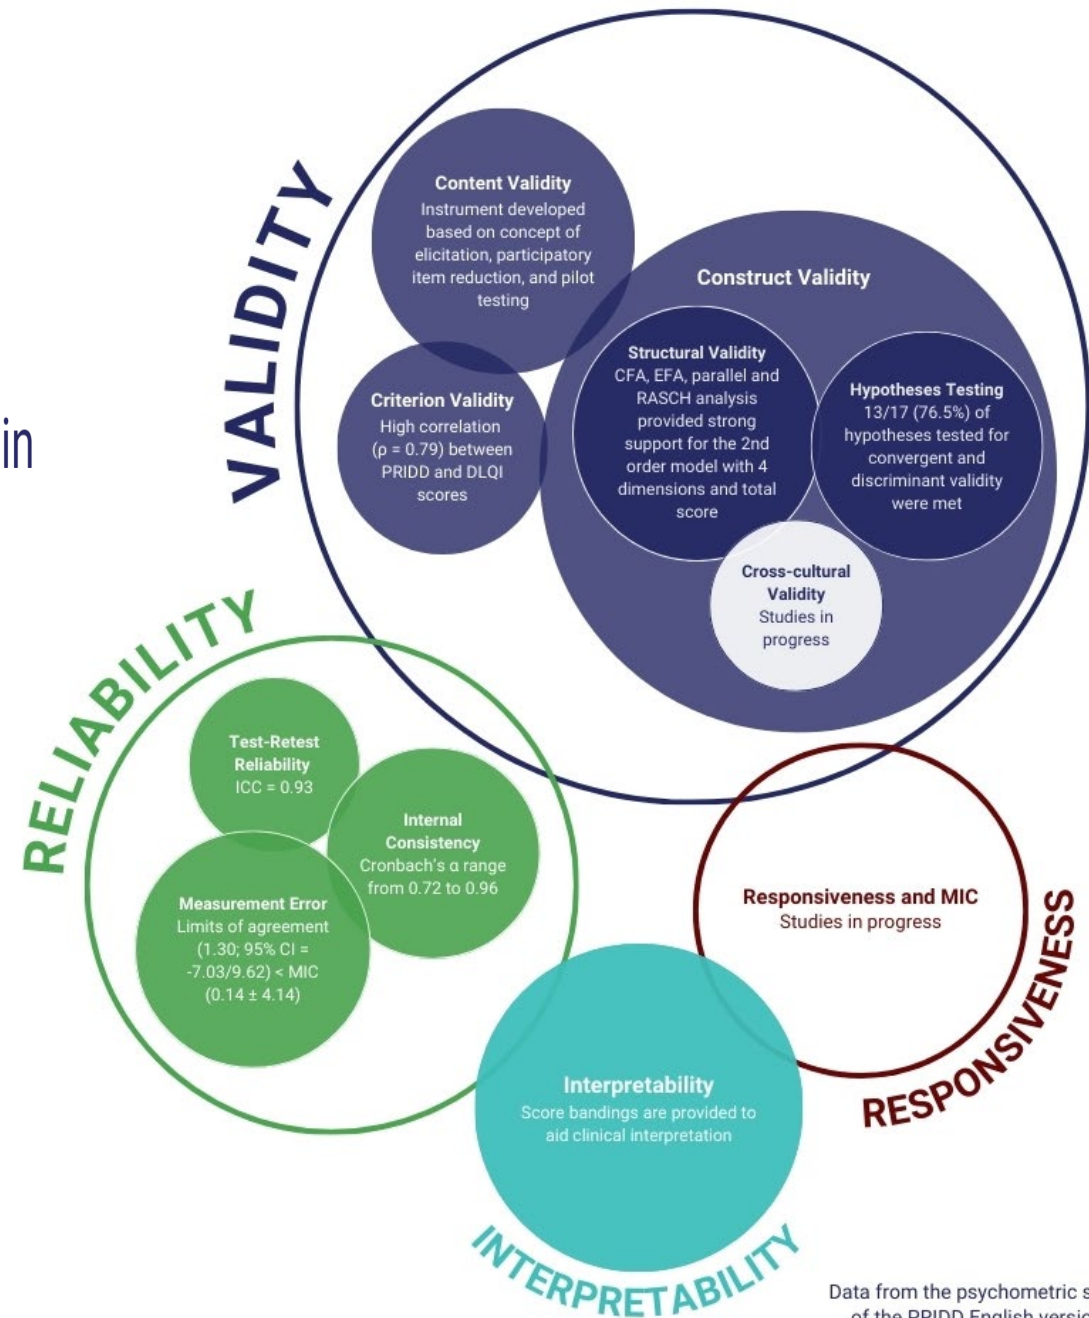

University Medical Center
Hamburg-Eppendorf

The first **PROM** in dermatology to be developed and **validated** in partnership **with patients**

*"I've completed a lot of dermatological questionnaires, but I **don't think I've ever seen them all integrated like this** in such a questionnaire ... I'm very, very happy with this. It has stirred my heart ... **There are things here that I wanted to discuss with my dermatologist** ... I'm really, really impressed with this. It's very good, it's excellent." (Participant 5)*

Psychometric testing: Comparison of Measures

PROM	Content validity	Structural validity	Internal consistency	Reliability	Measurement error	Construct validity	Responsiveness	Recommendation
DLQI	W	???	+++	?		+++	+++	B
PRIDD	++	+++	+++	+++	?	+++	?	A
Skindex	W	???	W	W		-	W	B
Skindex 29	W	???	+++	W		+++	W	B
Skindex 16	W	++	++			+	W	B

W = weak evidence; + = sufficient evidence; - = insufficient evidence; ? = indeterminate evidence

A= Recommended for use

B-Potential to be recommended for use, but they require further research

C= Should not be recommended for use

Patient-Reported Impact of Dermatological Diseases

Why use PRIDD in research?

It is the only **life impact measure** in dermatology that **meets all tested psychometric criteria** and is **recommended for use** according to the Consensus-based Standards for the Selection of Health Measurement Instruments (COSMIN) standards.

Enhances

understanding of disease impact
from a patient perspective

Supports

patient-doctor communication
and shared decision-making

Informs

tailored treatments based on
patient-reported outcomes

Read our PRIDD Journal Articles!

Patient Experience and Measuring Patient Burden

- **Debilitating** (often chronic)
- **Co-morbidities** (e.g., diabetes)
- Impaired ability to **work** and advance **career**
- Difficulty meeting **family** responsibilities

Physical Impacts

Access to Treatments

- Treatments are **unaffordable** for many
- More **research** needed for new treatments and cures

"THE GOOD NEWS IS THAT NEW MEDICINE CLEARED UP THE SPOTS, BUT..."

Patient Experience and Measuring Patient Burden

Time to diagnosis

PRIDD is like a Dermatological QOL Multi-Purpose Toolbox

There is a lot of excitement surrounding PRIDD
.... it will take time, partners and more research to discover its full value

Valid and reliable

17 Languages

Multi-dimensional

The only fully **validated** dermatology
impact measure applicable to
all skin conditions!

"It's our new method for determining who we should treat first. We take people in order of how loud they scream."

The only fully **validated** dermatology **impact measure** applicable to all skin conditions!

What is PRIDD?

Patient-Reported Impact of Dermatological Diseases (PRIDD) is a new and unique measure of the impact of dermatological diseases on the patient's life and is the first dermatology-specific tool that is applicable to all skin conditions. No other dermatology tool has such broad applicability.

PRIDD is a multidimensional questionnaire that assesses four dimensions of impact: physical, psychological, life responsibilities and social impacts.

PRIDD was developed using a scientifically rigorous and published methodology.

PRIDD assesses the four areas of impact:
